Implementation of scheduled work of Project

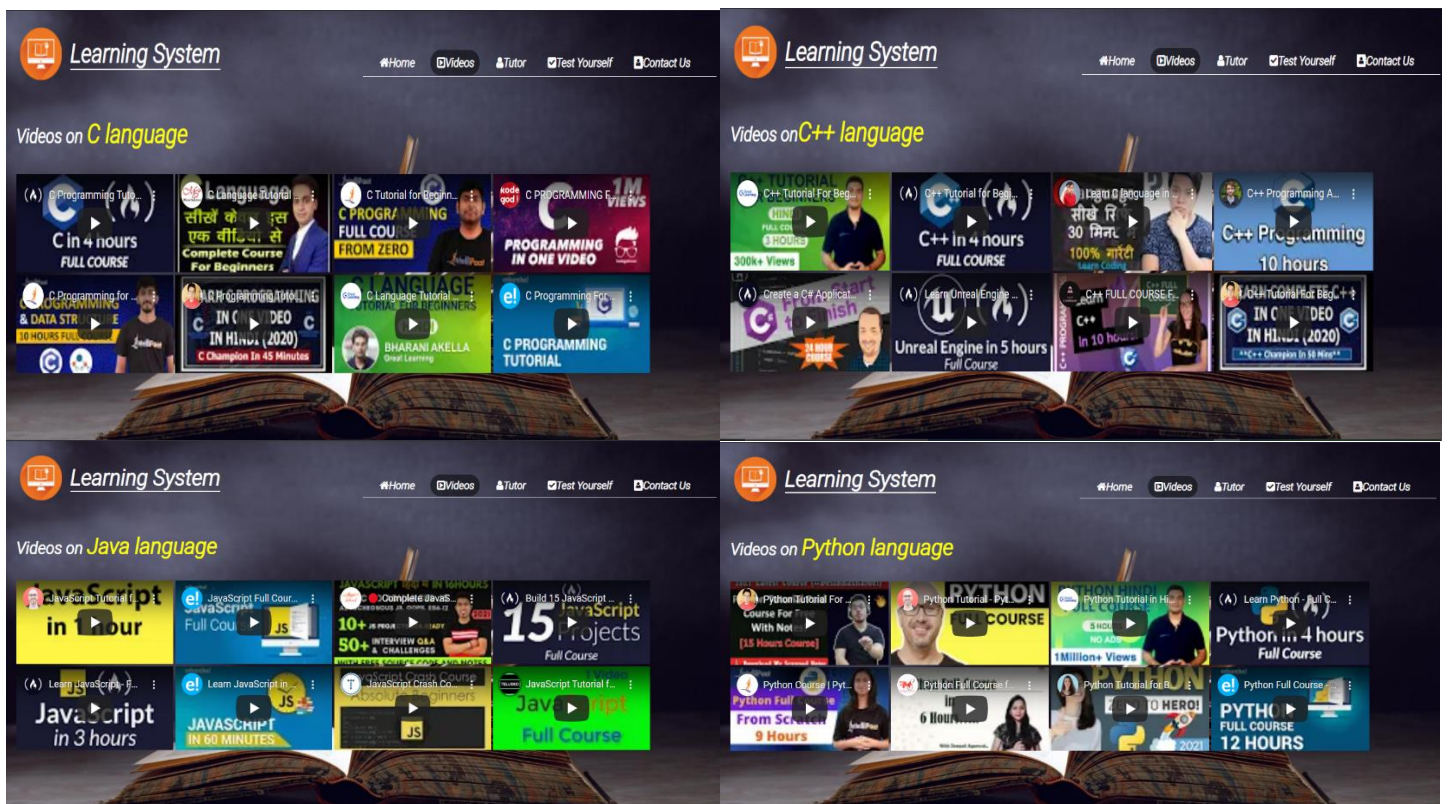

- First page is our home page in this page we use many interesting techniques like we use a beautiful background image than we create an amazing navigation bar with beautiful hover effect on the navigation .

- Second page is our video page and it basically about C, C++, Java, Python video page where user can learn languages by watching interesting video, in this page we logo, our website name, navigation bar and uses a grid display and button to link different language pages.

And its content is made by Sunita which is very beautiful, in these pages they have navigation bar and content rich videos which make u learn language in a minute.

- Third page is our tutor page where all available and hardworking teachers are there which can help people to guid and they can resolve their doubt by asking with these teacher. We are constantly adding new tutors so that we can always find something to meet your demands.
